URBAN FORESTRY WORKSHOPS

PLANTING 2018

OCTOBER 24th
JP COUGHLIN CENTER
625 E COUNTY RD Y
OSHKOSH, WI 54901

Instructors

Ryan Rodefer earned a Bachelor of Science Degree in Urban Forestry from the University of Wisconsin-Stevens Point and began his career with Wachtel Tree Science, Inc. in the spring of 2010. Ryan has a passion and skill for tree climbing systems, the advancements in technology, and integrating those systems into Wachtel's safety oriented culture. He has earned his ISA CTSP certification and now leads Wachtel's Safety Program. Ryan has recently accepted an adjunct professor teaching position with Gateway Technical College. Ryan is also involved with the Wisconsin Arborist Association seasonal conferences providing training and speaking engagements.

Mary Pederson earned a Bachelor of Science Degree in Environmental Science with a Minor in Forest Management from the University of Minnesota-Twin Cities and began her career with Wachtel in 2016. She has worked in all aspects of tree care including planting, pruning, removals, plant health care and tree inventory. She cares deeply about serving the community at large and that interest has led to a focus on consulting and urban forestry management. She also provides assistance with public tree inventories and the creation of urban forest management plans and Emerald Ash Borer Response Plans.

Ryan and Mary share a passion for trees, especially integrating a scientific approach to arboriculture and urban forestry to better serve clients, communities and trees alike. They have combined their respective professional backgrounds and exceptional communication skills to provide audiences with captivating and educational tree talks, and are excited to bring this experience to your community!

An EEO/AA employer, University of Wisconsin-Extension provides equal opportunities in employment and programming, including Title VI, Title IX, and the Americans with Disabilities Act (ADA) requirements.

Program Information

This one-day workshop will provide basic instructions and training for urban forestry clientele on how to plant trees to achieve optimal health and maximum benefits over time.

The workshop will include classroom instruction on proper planting techniques and specification fundamentals, and an outdoor demonstration of selecting planting sites, nursery stock inspection, planting, and post care techniques.

Who Should Attend

Community public works and parks employees, tree board members managers, and others who have responsibility for or are involved in community tree planting. Audience may also include groundskeepers, landscape contractors, tree & lawn care firms, nursery retailers, & Master Gardener Volunteers.

Fee is non-refundable, but transferrable to another attendee at this location only.
