

All across Wisconsin,
childhood
adversity
is hiding in plain sight.

The Wisconsin ACE Interface curriculum provides communities with an introduction to adverse childhood experiences (ACEs) and brain development. Trainers from nearly 30 Wisconsin child welfare, human service and other agencies volunteer their time and resources to facilitate the first step in the creation of self-healing communities.

**About Wisconsin ACE
Interface trainings**

Our volunteer trainers teach schools, health systems, law enforcement agencies and other community groups to identify and respond to the toxic stress of childhood adversity.

Following curriculum developed by Laura Porter, co-founder of ACE Interface, LLC, and Dr. Robert Anda, co-principal investigator of the original ACEs study*, the Wisconsin ACE Interface is geared toward building self-healing communities.

**Wisconsin ACE
Interface mission:**

Promote awareness of ACEs throughout Wisconsin; to create a shift in perspective in how we view health and social issues and; to inspire a new approach to building healthy and resilient communities.

To learn more: Visit SaintA.org/WIACEInterface or contact Sara Daniel, Director of SaintA Clinical Services, at 414.465.5711.

adverse childhood experiences (ACEs)

“ACEs are the leading determinant of the health and social well-being of our nation.” - Dr. Robert Anda

**And, they’re
*common.***

There are 10 Adverse Childhood Experiences (ACEs). The more ACEs an individual has, the higher their ACE Score and the greater their risk for long-term consequences.

The prevalence of ACEs is staggering. Nearly every community feels the medical and social burdens of subsequent behavioral and physical health problems, including depression, suicide, heart disease, diabetes and early death.

There is hope for healing, however. Start by understanding ACEs and their effects with a FREE Wisconsin ACE Interface training. Request a training at SaintA.org/WIACEInquiry

Find out more at ACEStudy.org or visit PreventionBoard.wi.gov, click “Our Work” and select “ACEs.”
