Tests include: pH, lime requirement, organic matter, available phosphorus (P) and available potassium (K).

Special Soil Tests (for an additional fee)
(List field or sample number)

Calcium/Magnesium	Zinc
Boron	Sulfate
Manganese	Other

Soil tests recommended if:

growing corn (field or sweet) Zn and SO₄-S	growing potato or apple (with pH < 5.5) Ca/Mg	
growing legume forage B and SO₄-S	growing specialty or vegetable crops B, Zn, and Mn	
growing small grain or soybean (with soil pH >7.0) Mn	acid or sandy soil with high amounts of applied K Ca/Mg

INSTRUCTIONS**Soil & Forage Analysis Laboratory in Madison: 608-262-4364****CHECK** how you wish to receive your results. **PRINT YOUR NAME - Please Print clearly**Fill in the county from which the sample(s) were taken. Please fill out separate forms for each county.

Fill in your address and the e-mail address if you would like the results e-mailed to you.

FIELD ID and **SAMPLE NUMBER(S)** - Record the field and sample identification for each field on the same line.**Please number samples consecutively.****SOIL NAME [REQUIRED]**Write the **full** soil name (**NOT** the abbreviation) from an FSA farm plan or county soil survey map. Example: Fayette silt loam, write "Fayette". If the field has more than one soil type, use the most predominant soil found in the field. A more precise soil test recommendation can be given if the soil name is included.**4-YEAR CROP ROTATION**Indicate the intended crops to be grown for the next four years (**one** crop code per year).

FERTILIZER CREDIT INFORMATION: Legume-sod plowdown or manure application may reduce nutrient need.**Previous Legume Crop:** Enter the crop code for the previous legume crop grown on the field. For all forage crops that were plowed down, indicate the % legume remaining in stand and check if there was more than 8 inches of regrowth in the fall before the stand is killed.**Manure Applied to Field Since Last Crop:** If manure was applied to the field since harvesting the last crop, choose manure code from **Manure Code List** on front. Specify the approximate rate of application in T/a for solid or 1000 gal/a for liquid manure, time to incorporation, and the number of consecutive years manure has been applied to this field.**SPECIAL SOIL TESTS:** Special tests may be run on individual samples, or all the samples from the same field may be combined at the lab for a single field analysis. If the special test(s) is requested on a field basis only, enter the field ID. If the special test(s) is requested for each sample, enter the field ID and sample number.
